

Avanceon's iBoiler™, a New Energy Management Solution, is Featured on "Industry Today" on Industrialinfo.com

SUGAR LAND--October 9, 2008--Industrial Info Resources (Sugar Land, Texas) will host special guest Avanceon (Exton, Pennsylvania) as part of this week's "Industry Today" webcast. The webcast will introduce Avanceon's new 24/7 energy management service that will provide critical operational and financial information to plant personnel for their use in optimizing boiler performance and reducing energy costs.

Join Bob Zeigenfuse, CEO of Avanceon, USA, along with the host of Industry Today, and learn how this new energy management service, named iBoiler collects, stores and calculates critical Key Performance Indicators, enabling you to manage and improve your boiler's performance, save you thousands of dollars, and improve your bottom line and ROI.

"In a word," explained Bob Zeigenfuse, CEO of Avanceon USA, "iBoiler is an invaluable reporting tool for characterizing, monitoring, and benchmarking boiler performance – the starting point for superior boiler energy management. It supports well-informed, real-time decisions that lead to the effective optimization of a boiler's performance and," he continued, "is easily customizable to different operating conditions and provides secure, real-time information.

"For anyone interested in getting a handle on their plant's energy costs," Zeigenfuse emphasized, "boilers are a good place to start. They are a major source of heat production and power, but they can also be 'energy monsters' consuming huge quantities of fuel and electricity."

Other features of the iBoiler Energy Management Solution include real-time savings calculator; data archiving and history management; intelligent load-sharing recipes for multiple boiler operation; web-based interface; data logging, trending, alarming and statistical performance analysis; and remote troubleshooting of boiler and operational support.

Exton, PA-based Avanceon is a leading provider to manufacturers worldwide of engineering services and system integration solutions. iBoiler is the latest in the company's portfolio of energy management solutions provided as part of the company's Factory Support Services offerings.

The company is located at 640 Rice Boulevard, Exton, PA 19341.
